

Session Program

4-5 Jun 2026

Theory at sea 2026

Gong show - Day 2 (morning)

Vayamundo Oostende
Zeedijk 330, 8400 Oostende

Friday 5 June

10:00

Gong show - Day 2 (morning)

Session | **Location:** Vayamundo Oostende, Zeedijk 330, 8400 Oostende

10:00–10:07 **TBD**

Speaker

Katharine Hyatt

10:07–10:14 **Integrability from Discrete Holomorphicity**

Speaker

Anton Martin

10:14–10:21 **How much SYK is enough for Quantum Chaos?**

Speaker

Pratik Nandy

10:21–10:28

Superconductivity from emergent dipolar interactions in a fractionalized Fermi liquid

Speaker

Mina-Lou Schleith

10:28–10:35

Fragmentation temperature of 1D and 3D quantum droplets in a BEC mixture

Speaker

Jeroen Van Loock

10:35–10:42

Extracting average properties of random spin chains with translationally invariant tensor networks

Speaker

Kevin Vervoort

10:42–10:49 **Metastable strings at PTA: classical stability analysis**

Speaker

Maxime Grandjean

10:49–10:56 **Noise Thresholds for Topological Codes**

Speaker

Vic Vander Linden

11:00
